

Plots from Simulations (500 reps)

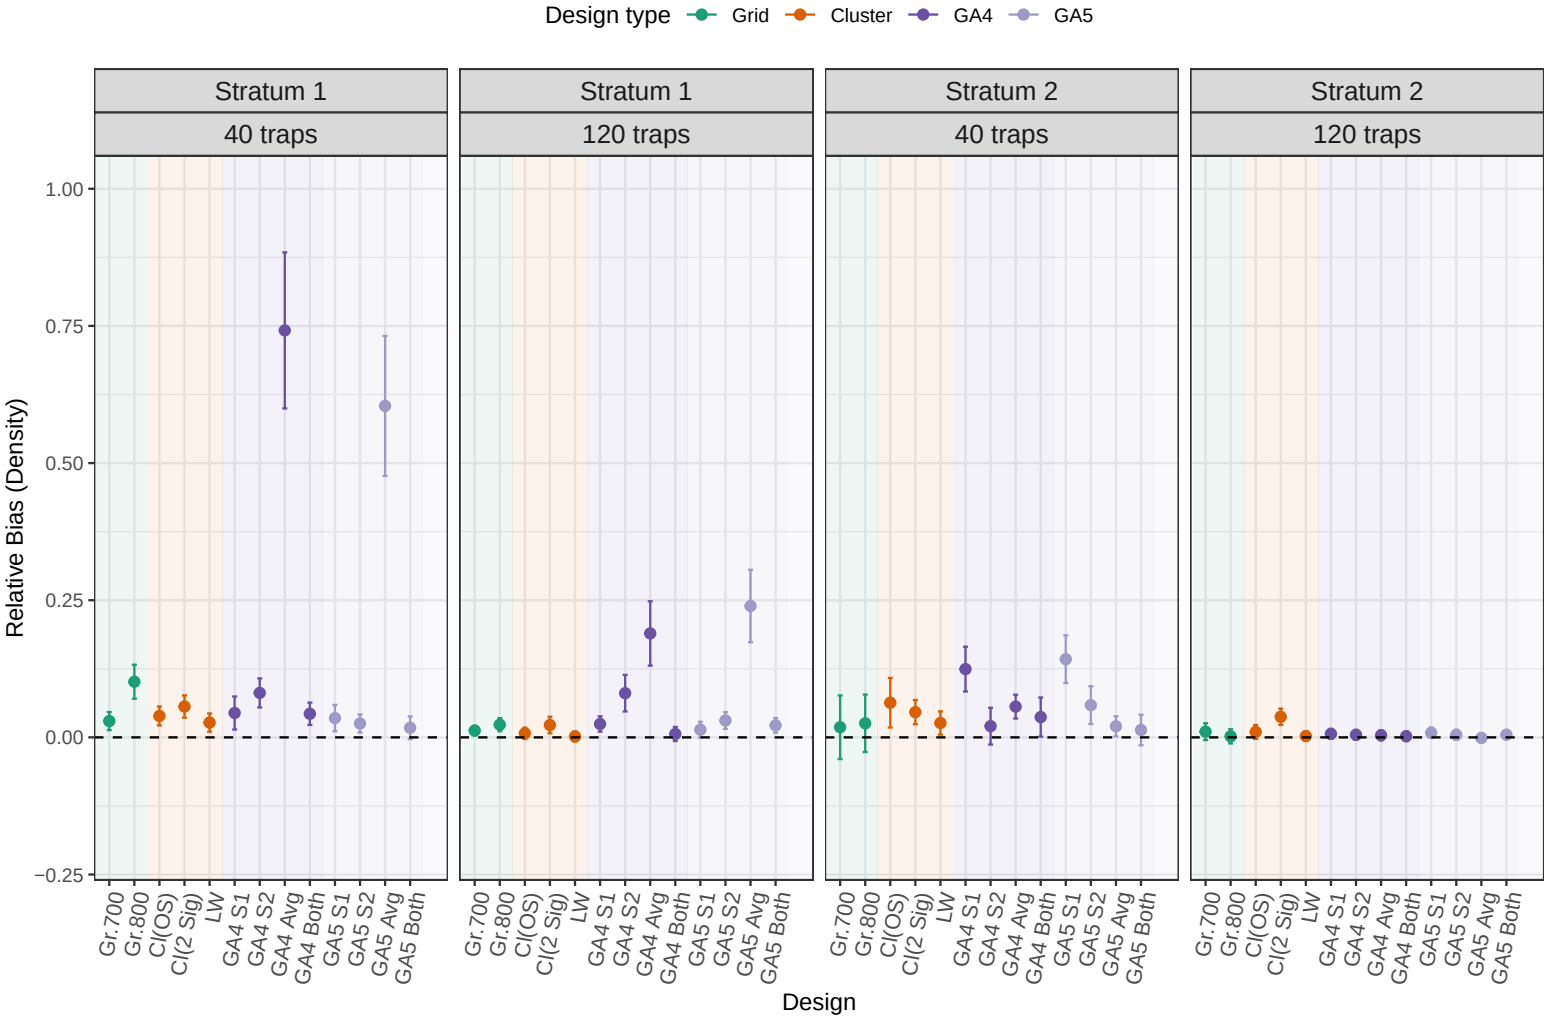

Simulation setup

- Strata 1: $D = 0.05$; $\sigma = 200$ m ; $L0 = 2$
- Strata 2: $D = 0.0033$; $\sigma = 3000$ m ; $L0 = 0.133$

Excluded reps

Simulations were excluded if any of the following criteria were met:

1. any estimate was infinite or NA
2. any std error relative to the parameter estimate exceeded 100
3. if any of the parameter estimates were more than 10 fold away from the true value

Simulation exclusion rates
