

Plots from Simulations (500 reps)

Simulation setup

- Strata 1: $D = 0.05$; $\sigma = 200$ m ; $L0 = 2$
- Strata 2: $D = 0.0033$; $\sigma = 3000$ m ; $L0 = 0.133$

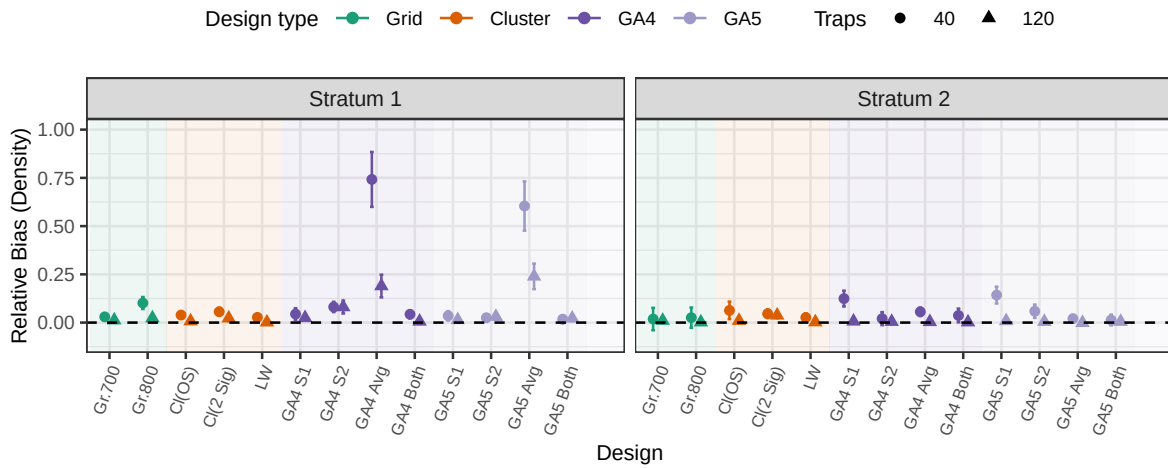

This version plots both trap levels together to see if the three plots together can render properly

Plots for Density

Performance for Density
